Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

II. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyah et al., US No. 6,406,032 ("Miyah").

Miyah discloses a cylinder head gasket plate having at least one flow conducting element (Fig. 1). The flow conducting element is provided on the cylinder head gasket, so as to protrude from the gasket (Fig. 3). The gasket plate compromises openings (3). The gasket is multi-layered (Fig. 4g).

Examiner Note: The claims are being examined as they pertain to the sub-combination. The functional language of the claims are given little patentable weight b/c the structural elements are capable of meeting the functional limitations.

Response to Arguments

III. Applicant's primary argument is that the element that Examiner has called a flow-conducting element, does not in fact constitute such an element. Examiner disagrees. Flow-Conducting is a very broad limitation. Beads 23a, and 23b are fully capable of allowing (i.e. conducting flow).

As far as the structure of the engine block is concerned, the limitations are given very little patentable weight because applicant has not positively claimed the sealing arrangement including the engine block, therefor the claims have been examined as they pertain to the sub-combination of a cylinder head gasket.

IV. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

V. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Enoch E Peavey whose telephone number is 305 1977. The examiner can normally be reached on Mon-Fri 8:00 am to 4:30 am.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on (703) 306-4115. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
